"Fly Time Is Typhoid Time" -Chicago Tribune.

Burn your garbage! Don't let it lie around the back door and rot. One can of foul garbage will breed enough flies to doom a whole neighborhood. God save the babies! They are sugar factories with the the first to suffer.

Tenants of flat buildings should demand of their landlord that he install a Kewanee Steel Garbage Burner for the sake of health. It burns the garbage while it is fresh.

The Chicago Examiner of last Sunday (June 12) in a double-page story of thrilling interest described the fly as "the world's greatest murderer." It "kills more soldiers than bullets," and "in peace slays more than war." It flies from your foul garbage can to your dining table. It leaves poison teherever it lands. Direct from a feast of putrid matter in the back yard and the back porch, it goes to the nipple of baby's bottle. It carries pollution with appalling speed and certainty.

Owners of hotels, restaurants, butcher shops, groceries and other places where garbage and filth collect in great quantities should buy these Kewanee Garbage Burners without an instant's hesitation. These burners not only destroy all garbage and filth without odor, but the burning matter heats the hot water

"An ounce of prevention is worth a pound of cure." When you do away with the foul garbage can you do away with the fly, and that stops the spread of disease. It isn't God's will that the babies be taken away in the summer time. It is the will of the man reho reon't prevent the collection of filth. God doesn't work through the garbage can. Prayer won't stop the fouliffy

Five thousand children die in New York City every summer

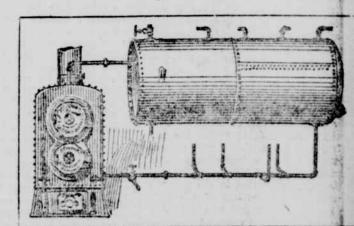

just because the breeding of flies is not checked. How many thousand are sacrificed in the other big cities of the Union? Parents see their little ones sicken and fade business. The bill will come up on Mon- away. They call it the "will of the Almighty" and try to feel resigned. They never feel resigned. And it isn't the will of the Almighty. Rats! What's the use trying to hide

> Stop your nonsense and burn that garbage! One simple precaution-the purchase of a Kewanee Garbage Burner-will reduce infant mortality four-fifths. Isn't it worth while? We don't rail at religion, and possibly we are as good at heart as anybody else, but when we know what the damnable fly is doing, and how many lives we save if we destroy the fly, why should we be conservative when the truth will do the work?

The Kewance Garbage Burner takes your garbage fresh from the table-while it is tresh and wet and reduces it to nothingness in a few seconds. If you use it there will be no garbage can around your premises and no filthy garbage wagon will call at your back door. The air around you will be pure. Your children will be safe from ninetenths of the diseases that grab and kill them now.

Follow your religious bent as much as you wish, but don't

let it interfere with your practical, common, everyday good sense. Send for illustrated pamphlet telling all about the Kewanee Garbage Burner. Read it and send it to your landlord. If you run a hotel or a restaurant be man enough to put this Burner in your place of business. Help the newspapers in their campaign for cleanliness. Help humanity. Help yourselves. Help the helpless babies. Think of something else besides money.
